

Intel Pandemic Response Technology Initiative

100-DAY REPORT

To date, we have partnered with more than

100

ORGANIZATIONS

on nearly

200

PROJECTS

in these areas

Technology

Healthcare

Industrial

Retail

Education

Transportation

and others

totaling over **\$30M** in contributions so far.

Announced in April, the Intel Pandemic Response Technology Initiative targeted investments of **\$50 million to combat COVID-19**. We are committed to accelerating access to technology that can combat the current pandemic and get ahead of future pandemics through scientific discovery, enable remote learning for students and aid in economic recovery.

Response, Readiness and Prevention

Response

Respond to immediate crisis

Focus on diagnostics, life-critical care and emergency treatment

Readiness

Manage health crisis on sustained basis

Reduce contagion to limit spread

Plan for future waves

Prevention

Enable prevention through vaccine and drug discovery, clinical trials and population health efforts

Online Learning Initiative

Devices

Supply devices and connectivity for schools

Content

Improve attendance, accountability and engagement

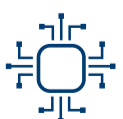

Cloud Services

Deliver remote learning to students across the globe

Economic Recovery

Technology

Innovation

Leadership

Key considerations to keep businesses open and growing:

- Comprehend new rules and obligations.
- Focus on employee and customer safety.
- Adjust rapidly to a dynamic environment.
